Remarks

The following is a response to the Office Action dated October 23, 2001.

Having done so, it is respectfully submitted that claims 1-31 are now devoid of any of the noted indefiniteness problems.

As amended, independent claims 1, 16 and 31 each now feature the displaying of the image as shown for example in Fig. 3 of the instant application when it is not a peak time period, and the image of Fig. 4 when it is a peak time period. Savage does not disclosure such separate displays. In other words, Savage does not have the capability of displaying one image at a peak time and another image at a non-peak time.

New claims 32 and 33 each recite that the "command signal" for initiating the prediction of the quantity of articles to be prepared is a command signal, generated for
